CUMULATIVE EDITORIAL INDEX

Including February 1984 through December 1984. Number preceding hyphen is month of issue; those following are page numbers. Asterisks indicate items appearing in departments. PRODUCTION ENGINEERING is indexed in Applied Science & Technology and the Engineering Index, available in libraries generally. Microfilm copies are available from University Microfilms, 300 N. Zeeb Rd., Ann Arbor, MI 48016. Reprints of early issues are available from Johnson Reprint Corp., 111 Fifth Ave., New York, NY 10003. The January 1984 issue is the annual Productivity Reference Issue and Buyer's Guide, containing overview articles on all major manufacturing equipment. Single copies are available at $5.00 each, prepaid, from PRODUCTION ENGINEERING, 1111 Chester Ave., Cleveland, OH 44114.

Battersby, Mark E., Tax Savings Can Cut Improvement Costs, 10-38

Bogart, Henry G., Modern NDT Methods—Express Tests, No Sidetracks, 5-86

Burls, Gary, The Economics of Powder Coatings, 7-78

C

CAD/CAM
- Automated Factory Update, 3-66
- The Best is Yet to Come!, 2-8*
- CAD/CAM Offers Textile Industry Major Savings, Unique Flexibility, 10-16*
- The Challenge of Computer Integrated Manufacturing, 10-52
- Future of CAD/CAM Tied to Better Ways of Calculating Productivity Gains, 4-10*
- Megabytes of Assembly Aids, 10-82
- Selecting a CAD Operator, 5-78
- Taking the Step from CAD/CAM to CIM, 11-52

Carter Jr., Charles F., Look! The Tools Are In Your Hands, 9-84

Chamot, Ph.D., Dennis, Employees: Indispensable Elements, 9-106

Controls
- Bar Codes—Working Harder With Smarter Scanners, 7-62
- Coalition Formed to Offset Fear of Computer Terminals, 4-10*
- Computer-Controlled Machine Shop Paves Way for Automatic Factory, 2-10*
- Counters and Timers—Keeping Pace in Manufacturing, 7-54
- Decision Processing is Best Hope for Breakthroughs in Computer Use, 9-12*
- Graphics Terminals—Electric Windows to the Shop Floor, 5-60
- Personal Computers Enhance Utility of Online Database Services, 9-14*
- Personal Computers Increasingly Used for Real-Time Data Acquisition, 5-10*
- Putting More Control in Controls, 3-78
- Small-Tool Breakage Monitor Lets Manufacturer Automate, 3-22
- Starting Out In CNC—Success from the First Chip, 8-60K
- Voice Data Entry—Speech Helps Make You Free, 7-58
- Who Will Maintain Personal Computers Used in Industry?, 8-15*

Curtin, Frank T., Planning and Justifying Factory Automation Systems, 5-46

D

Drives
- Modernized Drives Boost Steel Finishing, 4-22
- The Quiet Revolution in Drives, 2-52

Dray, John B., What's Positive About a Recession?, 2-48

It's Time to "Cell" Your Factory, 12-50

E

Education
- Education: Cultivating A Cash Crop, 9-114
- Computer-Based Training for Industrial Automating Proceeds at Trainee's Pace, 5-16*
- Training Systems Prepare Workers for the Factory of the Future, 2-15*

Economics
- Financing: The Backing To Go Forward, 9-122
- Jobs Gravitate to Low-Wage Countries when Companies Shun Technology, 8-16*
- Relentless Economic Forces, 10-8*
- Strategic Justification, 3-8*
- Study Details Economics of CNC Automatics, 2-24*
- Tax Savings Can Cut Improvement Costs, 10-38
- Worldwide Sources of Supply Create Different Economic Realities, 9-16*
- You Shouldn't Use Usual Methods to Justify a Robot, 5-16*

Evans, David, Financing: The Backing To Go Forward, 9-122

Maller, Robert J., The Structure: Simplify And Focus, Or Collapse, 9-62

Management
- A Perspective for Success, 4-8*
- Factory Factors: Quantify Your Goals, 9-50
- The Managers: Maestros or Magicians?, 9-38
- Planning and Justifying Factory Automation Systems, 5-46
- Strategic Planning—Productivity's Keystone, 6-46

Manufacturing
- Abrasive Jet Machining Deburrs Tiny Parts, 8-22
- Add Months to Machine Tool Life with Tape, 9-136*
- Bursts of Heat will Create Ultrasmooth Plastic Parts, 6-23
- Can High Technology be Too High, 7-8*
- Can Surface Defects be Identified at Mill Rolling Speeds?, 10-24*
- Counters Keep "Unpaid" Product from Rolling Away, 12-73
- Detroit Report: Motivation in Motown, 10-44
- Economics of Powder Coating, 7-78
- Fast Motion, Real Problems? Time for a Slow Look, 5-22
- Flexible Assembly—A Search for Economics of Scope, 12-40
- Get Good Marks with Lasers, 12-56
- Help NC Machine Ball Screws Grow Old Gracefully, 6-92
- Important Note: Process Variables Affect Performance of Coated Tools, 6-15*
- It's Time to "Cell" Your Factory, 12-50
- Look! The Tools Are In Your Hands, 9-84
- Machine Tool Gazette, 8-64
- Magnetic Flux in Moving Strip is a Measure of Annealing Quality,

5-104*
Manufacturing Systems for the Automated Factory, 8-42
Microwaves—Very, Very Good Where They Fit, 11-80
New Process Creates Highly Improved Synthetic Diamonds, 7-88*
Parts Created Layer by Layer by Spraying Metal onto a Form, 5-24*
Plastic Parts Joined by Friction Welding, 2-24*
Production Wearsurfacing—More Choices, Better Products, 8-56
Recycling Fluids Cool Costs, 10-64
Right Heat Shapes Up Parts Production, 4-70
Robots Focus on Integrated Manufacturing, 7-46
Starting Out In CNC—Success From the First Chip, 8-60K
The Structure: Simplify and Focus, Or Collapse, 9-62
Success Rule 1: Use All the Help You Can Get, 2-22
Taking the Step from CAD/CAM to CIM, 11-52
Technology's Tomorrow Just Arrived, 9-72
Tests Point to Changes Needed in Machining Composite Materials, 7-24*
Tighten Torque Accuracy and Cost Control, 11-22
Turning Cells Boost Gear Blank Output, 8-60C
Water and Grit Create Powerful, No-Heat Method to Cut Metals, 6-23*
Water Power!, 12-62

Materials
Additives Improve High Water Content Hydraulic Fluids, 2-79*
Barrier Resin Extends Use of Blow-Molded Containers, 2-80*
British Industry's Spreading Use of Adhesives, 5-94
Circuit Board Cleaner Wins at Video Games, 9-24*
Conductive Fiber Glass Components Create Versatile PC Handling System, 4-86*
The Economics of Powder Coating, 7-78
Elastomer Meets Multiple Demands, 2-78*
Hydraulic Fluid Study Underscores Growths, Declines in Industry Usage, 9-138*
Magnetic Flux in Moving Strip is a Measure of Annealing Quality, 5-104*
Mutant Bacteria Do a Cheaper Job of Oxidizing Wastes, 8-16*
New Type of Glass Points to 5-year Operating life for Small Batteries, 5-103*
Parts Created Layer by Layer by Spraying Metal onto a Form, 5-24*
Photo-bleachable Coating on Chips Creates Sharper Circuit Images, 7-87*
"Plasticworking" Challenges Metalworking, 11-66
Production Wearsurfacing—More Choices, Better Products, 8-56
Recycling Fluids Cool Costs, 10-64
Robot and Solvent Combine to Improve Productivity, 6-116*
Second Generation Water-Based Hydraulic Fluid, 3-86*
Simplify Assembly with Adhesives, 5-102*
Sticky Problem Unstuck, 7-86
Success Rule 1: Use All the Help You Can Get, 2-22
Super Conductors Create Superfast Microcircuits, 7-10*
Tests Point to Changes Needed in Machining Composite Materials, 7-24*
Water and Grit Create Powerful, No-Heat Method to Cut Metals, 6-23
Water Power!, 12-62
